Summary

```
class Person {  
    constructor() {  
        this.firstName = firstName;  
        this.lastName = lastName;  
        this.age = age;  
    }  
}
```

Summary

```
class Person {  
    get fullName() {  
        ...  
    }  
  
    set fullName(fullName) {  
        ...  
    }  
}
```

Summary

```
class Person {  
    isAdult() {  
        ...  
    }  
}
```

Summary

```
class Person {  
    static adultAge = 28;  
    static fromName(name) {  
        ...  
    }  
}
```

Summary

```
class Person {  
    ...  
}
```

```
class Student extends Person {  
  
}
```

Summary

```
class Person {
```

```
    ...
```

```
}
```

```
class Student extends Person {  
    constructor(param1, param2) {
```

```
        super(param1);
```

```
    }
```

```
}
```
